# Drive measurable outcomes by accelerating migration from AWS to GCP with Searce

## Overview

If you have workload on AWS, Searce has a dedicated program to drive cost savings and business value by migrating them to GCP, leveraging Searce's 100+ accelerators (IP)

## Benefits

### Reduce Operational Cost

Cost optimization, discounts and incentives

### Optimize Cloud Spend

Leverage containerization and better resource utilization

### Improve Agility

Faster time to market for new feature release with CI/CD automation

### New Revenue Channel

Unlock additional benefits with Google Cloud Marketplace

### Reduce Overhead

Reduce maintenance overhead and production downtime

## Searce's GCP Accelerators Program

Searce has built 100+ accelerators to make the transition from AWS to GCP frictionless and meaningful for numerous use cases.

Accelerators include SoW templates with pre-approval for Google funding, automated TCO assessment to understand cost savings, GCP migration and deployment demo videos to understand the journey and much more.

Accelerators also include migration automation tools to reduce migration time by ~10%-50%

## reimagine 'what's next"

### Discover and consult:

Explore what's possible and what is not and experience the advantages of working with "real-solvers" through our discovery and consultation

### Outcome:

Architecture and TCO assessment to understand cost savings and transformation opportunities
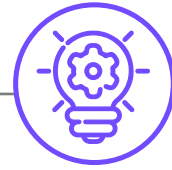

## redefine the "how"

### Consult and implement:

Getting our hands dirty together generates a prioritized use case to tackle- then we get to work building the vision

### Outcome:

List of prioritized use cases that are agreed upon. Faster turnaround on SOWs by leveraging our pre-approved and funded templates to sign off and and go live

## realize the "next now"

### Implement & Improve:

Leverage Searce's engineering expertise and automated migration tools for migrating your workloads to GCP faster and with reduced overhead

### Outcome:

Realize the benefits of running your workload on GCP

## Sample Use Cases

| EC2 to GCE Migration | Automating GCP Landing zone deployment | Migration to GCP Managed Databases (Cloud SQL, AlloyDB, Bigtable, Cloud Spanner, Firestore) - 21 Source & Destination offerings |
| EKS to GKE Migration | Automating App deployment on GCE or GKE cluster | |
| ECS to GKE Migration | Automating App deployment on Cloud Run & Cloud Function | Redshift to BigQuery Migration |
| EC2 to GKE Migration | Automating CI/CD with Jenkins, ArgoCD, etc | |
