

Futurify your business with Data & Analytics

Transform your data, cloud and analytics strategy with a modern approach

Our goal is to help enterprises overcome their data challenges and adopt modern paths to transformation.

Bridging the gap between data silos

Streamlining & managing the huge influx of data

Upgrading legacy systems for improved processes

Incorporating data science driven decisions

Ensuring data privacy, security & compliance

Searce focuses on solving for better, which translates to modernizing data engineering, setting up data governance and ensuring data readiness for analytics and AI.

Data Democratization

Consumption: BI, Data activation

Specialized Analytics: Marketing Analytics, Financial Analytics, HR Analytics & Predictive Analytics

Data Management & Governance

Governance: Data cataloging, Data lineage, Privacy & Security, Data access and sharing, Data lifecycle

Management: Data quality, DataOps, Customer 360

Data Engineering & Modernization

Engineering: ETL & Reverse ETL

Migration & Modernize: Data Lake, Data Warehouse, Lakehouse, Customer Data Platform, Data Mesh & BI modernization

For an enterprise to operate with speed, agility and scale, they must leverage data, its associated processes and consumption workloads on cloud.

Searce has helped organizations across industries derive value through data-driven decisioning with the help of Google Cloud. Cloud Migration is just the start. The leap to advanced analytics and business intelligence will bring innovation.

Success Stories

Solution

Key Data Modernization use-cases where Searce enabled customers to adopt a cloud native Centralized Data Lake/ Data Warehouse

Business Impact

- ✓ Improved Data Quality and Consistency
- ✓ Faster Query Performance that enables an AI-ready platform

Solution

Searce helped modernize and build analytical reports and dashboards for industry-specific use-cases to derive impactful insights

Business Impact

- ✓ Better Decision making
- ✓ Self-service Analytics
- ✓ Interactive Dashboards
- ✓ Real-time data analysis

How to engage with us?

Workshops, Hackfests & Consulting

Explore what's possible and what is not and experience the advantages of working with "real-solvers" through our futurify workshops.

PoC & MVP

Getting our hands dirty together generates a prioritized use case to tackle - then we get to work building the vision.

Production Grade

Leveraging working prototypes to taking them to the next stage of production quality platforms.

Managed Services

Focus on your business while we take care of your data needs
